Professional Summary

Results-driven Senior Software Engineer with over 7+ years of expertise in full-stack development, specializing in scalable backend architectures, distributed systems, and modern database design. Proven track record of designing robust database schemas and high-performance microservices using Node.js, TypeScript, React, and Python. Expert in orchestrating complex data pipelines with Kafka, Redis, and Temporal, and integrating state-of-the-art GenAI / LLM workflows to automate enterprise-scale industrial processes. Demonstrated leadership in guiding engineering teams, architecting zero-to-one solutions, and translating complex client requirements into resilient, high-impact production software.

Core Technical Expertise

Languages & Frameworks: JavaScript, TypeScript, Node.js, Express.js, Bun, Deno, React.js, Redux, Tailwind, Bootstrap, CSS, Python
Data Stores & Caching: MongoDB, PostgreSQL, MySQL, Elasticsearch, Redis
Distributed Systems & Cloud: Apache Kafka, Temporal, SQS, Pub/Sub, Microservices Architecture
Tools & Practices: Git, GitHub, GitLab, REST API Design, Web Crawling, Unit Testing (Vitest, Jest, Mocha)

Professional Experience

Zemoso Technologies, Hyderabad Jan 2023 – Present

Principal Software Engineer I

- **Team Lead & Architect — Asset Health Score (Client: Baker Hughes):** Architected the complete end-to-end software architecture and optimized relational database schemas for a high-priority enterprise GenAI application designed to evaluate the operational health of heavy machinery on oil rigs.
- Led a cross-functional engineering team to build and deploy automated LLM workflows and reporting pipelines, reducing the operational manual effort of generating machine risk summaries from weeks to hours.
- Spearheaded the integration of modern LLM tools to process raw unstructured and operational machinery data, delivering highly accurate, automated risk reports and prescriptive health scores.
- **Senior Engineer — Amplifier Security (Client: Amplifier Security):** Designed and implemented core REST APIs and distributed microservices for an AI-powered cybersecurity human risk management platform acting as an organizational control plane.

- Configured complex asynchronous workflows, user-centric security guidance loops, and automated remediation pathways utilizing Temporal, Redis, Pub/Sub, and MySQL.
- Coordinated closely with frontend engineers to seamlessly integrate data-dense UI elements with high-performance, testable backend REST endpoints.

Globant, Pune Jul 2022 – Dec 2022

Senior Software Engineer

- Engineered highly resilient, testable codebases for complex software systems using Node.js and TypeScript, ensuring alignment with strict enterprise quality standards.
- Optimized high-throughput search operations and transactional data queries across distributed data stores using Elasticsearch and PostgreSQL to improve analytical portal response times.

Tech Prescient, Pune Oct 2021 – Jul 2022

Software Engineer

- **Market Intelligence Platform (Client: Teikametrics):** Developed robust backend infrastructure supporting a large-scale e-commerce market analysis platform handling competitive tracking data using Node.js, Express.js, and Elasticsearch.
- Streamlined real-time competitor data streams and product ranking trackers utilizing PostgreSQL, Redis, and Apache Kafka, empowering retail brands to seamlessly maximize incremental growth.

Innoplexus Consultancy Services Pvt Ltd, Pune Sep 2019 – Oct 2021

Associate Software Engineer

- **Curia Platform:** Built core backend APIs handling medical profile matching and clinical oncology trial navigation for patients, leveraging Node.js, Express, Kafka, and MongoDB.
- **ACUO Search Engine (Client: Parexel):** Designed and optimized custom web crawlers and reliable data ingestion pipelines to index, search, and bookmark extensive clinical trials, grants, and literature for Parkinson's disease using Elasticsearch.
- **Biomarker Dashboard (Client: Gilead):** Developed high-performing data aggregation layers to facilitate comparative analysis and inter-connection models across 70k+ biological indicators for Inflammatory Bowel Disease.

Education & Certifications

Post Graduate Diploma in Advanced Computing (PG-DAC) | Infoway Pvt. Ltd. (70.40%, First Class, 2019)
Bachelor of Engineering (B.E.) in Electronics | Shivaji University (62.19%, First Class, 2016)
Certification: React - The Complete Guide (Hooks, React Router, Redux)
